Dosher imaging unit named for retired physician

SOUTHPORT—The Dr. Richard Corbett Diagnostic Imaging Suite is now the name of this unit at Dosher Memorial Hospital after a Dosher Foundation ceremony on August 25.

The retired radiologist who worked at Dosher from 1962 to 1988 has supported the hospital in general and the imaging department in particular with numerous monetary and other gifts over the years.

More than 70 guests attended the event, including residents of Brunswick, New Hanover and Bladen counties. Tom Ryan, former hospital administrator from the 1970s, was one of several speakers who called Dr. Corbett a mentor.

Guests that evening also toured Dosher's newest imaging technology, a 3D mammography suite.

(Editor's note: Please see two photos and captions on following page.)

Dr. Richard Corbett (in suit) listens as Doshier Foundation President Lynda Stanley (right) reads the sign to be displayed in the hospital department named in his honor. They are joined by Doshier Board trustees, Foundation Board members, physicians and other guests.

Dr. Corbett reminisces about his 26 years as the radiologist at Doshier, 1962-88. He was the first radiologist in Brunswick County.
