## **Dosher Emergency Department earns clinical award**

SOUTHPORT—National emergency medicine consulting firm T-System Inc. has presented the Emergency Department (ED) at Doshier Memorial Hospital an award for “Excellence in sustainable outcomes for 2015.”

“Doshier stood out among the many applications we received. We were impressed by your compelling story of success in emergency care and proud that T-System was able to play a role in helping you achieve that success,” Roger Davis, chief executive officer, T-System, wrote to Doshier.

The T-System Excellence Awards Program recognizes a small number of hospitals from among its more than 1,900 hospitals, freestanding emergency centers and primary and urgent care facility clients in the U.S. This is the second straight year that Doshier was recognized by T-System for improving patient outcomes, and the third time in the past five years.

“We’ve made continuous improvement reducing the rate of patients who leave without being evaluated by the physician, getting patients to the doctor faster, and improving clinical documentation. T-System was impressed with our progress,” JoAnn Turzer-Comnesso, RN, director, Doshier ED, said.

The firm also presented a \$500 donation to the Doshier Hospital Foundation in the name of the ED.

T-System Inc. is a Dallas-based firm that provides clinical, financial, operational, and regulatory solutions for hospitals and urgent care clinics.

The ED at Doshier is open around the clock every day of the year and treats more than 13,000 patients annually. Read more about Doshier emergency services at [www.Doshier.org/emergency](http://www.Doshier.org/emergency).
