Dosher Wound Care Center Celebrates 5th Anniversary

SOUTHPORT—November marks the fifth anniversary of the opening of the Healogics® Wound Care Center at Doshier Memorial Hospital. The Doshier Wound Care Center, which offers highly specialized wound care to patients suffering from diabetic ulcers, pressure ulcers, infections, and other chronic wounds which have not healed in a reasonable amount of time, has been recognized as a National Center of Excellence for the past three years for their exceptionally high heal rate and patient satisfaction scores.

Treatments at the Center include hyperbaric oxygen therapy, which works by surrounding the patient with 100 percent oxygen under pressure to help progress the healing of the wound. Since opening in 2014, The Doshier Wound Care Center has worked with nearly 1,200 patients and has performed over 3,000 hyperbaric treatments.

“When we help a patient heal a wound, we are not only helping to restore health and quality of life. In many cases, we are eliminating the need for amputations,” says Brad Hilaman, MD, Medical Director, Doshier Wound Care Center. “Our team takes great satisfaction in knowing to what extent their work makes a difference to the people we treat.”

For more information, call 910-454-1192 or visit Doshier.org/Wound.
